CENTRE OF COMPETENCE ON  
HUMANITARIAN NEGOTIATION

# SUPPORTING HUMANITARIANS WHO NEGOTIATE AT THE FRONTLINES

In collaboration with the ICRC Virtual Reality team, the Centre of Competence on Humanitarian Negotiation (CCHN) is developing a virtual negotiation simulation based on Artificial Intelligence which will allow humanitarians to fully immerse themselves into a realistic field negotiation scenario.

By attempting to negotiate passage through a checkpoint, professionals will exchange with an avatar whose reactions are trained through the experiences of actual humanitarian negotiators, putting their skills and strategies to the test.

## ABOUT US

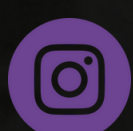

Founded in 2016, the Centre of Competence on Humanitarian Negotiation is a joint initiative of the International Committee of the Red Cross, Médecins Sans Frontières Switzerland, UNHCR, and the World Food Programme.

We provide training, learning, and sharing opportunities to professionals who negotiate assistance and protection for people in crisis. At the core of our work is a community of frontline negotiators spanning the globe.
